## SK8S

LIGHT WEIGHT BLADES

INTRODUCING THE FIRST  
NEW FIGURE SKATING BLADES IN  
MORE THAN 80 YEARS!!!

Lighter and stronger... lets you  
produce more power, tighter spins,  
higher & longer jumps and  
quieter & smoother glides!

Extra-strong, one-piece aluminum construction is  
virtually unbreakable  
45% stronger than the competition

Unique triangular shape for increased  
strength & stiffness

When blade flexes, it acts like an energy-absorbing "spring"  
for higher and longer jumps

Each skate is exactly alike  
Paramount blades are manufactured using state of the art  
computer controlled machines with very high accuracy  
making every blade precise and identical

Lasts up to 80 hours between sharpening  
Saving you time and money

Available in a variety of colours  
Chrome, Icy Blue, Icy Pink, Icy Purple, Jet Black, White!

PARAMOUNT has advanced the performance of figure skating blades to a new level. Using aerospace quality materials and computer controlled manufacturing, PARAMOUNT has produced the best blade available today. PARAMOUNT didn't just make the most advanced blades available, but they have also made the most affordable.

PARAMOUNT'S design uses a unique triangular shaped frame, increasing strength and stiffness. PARAMOUNT blades are made from a lightweight aerospace aluminum holder and a high-quality steel runner. Most skate blades are made from carbon steel then brazed together as separate pieces. The light weight PARAMOUNT blades, help skater's achieve higher and longer jumps.

PARAMOUNT blades use a high-grade stainless steel runner. Stainless steel is much stronger than regular carbon steel blades and holds an edge much longer between sharpening. Which results in longer blade life. Despite 440C stainless being 9 times more expensive than carbon steel, PARAMOUNT blades are lower priced than the competition.

PARAMOUNT offers a full line of figure skating blades. Designed to have similar characteristics to existing MK and Wilson products the PARAMOUNT blades make it easy to move up to the best blade available.

MODEL440 is the ultimate blade for today's competitive skater. Offering the highest quality edge and longest life, plus the lighter weight and strength of the Paramount design, is ideal for skaters needing the best available.

MODEL420 is ideal for skaters just starting to enter the competitive stream or are still experiencing rapid foot size growth. MODEL420 offers the same high-level performance as the MODEL440 but offers slightly less blade life to save money.

MODEL1085 offers the weight advantages of the top of the line MODEL440 but uses a high quality carbon steel runner for the less demanding beginner figure skater. The lower cost 1085 gives younger smaller skaters the advantages of the lightweight Paramount Blades at a cost suited for the beginner.

The DANCE MODEL offers the same lightweight and stainless steel runner as the MODEL420 but in a profile and width similar to the MK Gold Dance blade. The DANCE MODEL's dance radii, 3mm thick blade, dance toe pick and short heel is perfect for those who want deeper edges, shorter heels, and custom toe-picks for Ice Dance.

## Express yourself in color!

Paramount blades are available in a variety of popular colors.

Standard colors are Chrome, Icy Pink, Icy Purple, Icy Blue, Jet Black and Snow White.

Custom colors are available at extra charge.
